July marks seventh consecutive month of year-over-year job growth for Indiana

State's month-to-month comparison shows decline

INDIANAPOLIS, Ind. – Today the Indiana Department of Workforce Development released preliminary July and revised June **payroll employment figures** for the state.

Compiled in conjunction with the U.S. Bureau of Labor Statistics, payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers. The estimate is taken each month during the week of the 12th.

Indiana's preliminary *seasonally adjusted* payroll employment for the month of July was 2,911,800 jobs. The figure marks a decline of 1,700 jobs from the previous month, but an overall increase of 17,100 jobs when compared to July 2003. The state's preliminary *non-seasonally adjusted* figure reported 2,878,400 jobs in the state for the month. The number reflects 17,300 more jobs than existed in July 2003, but 33,800 fewer than existed in June 2004.

At the same time, the nation's preliminary *seasonally adjusted* payroll employment figure grew slightly by 32,000 jobs in July to reach 131.3 million jobs. The country's preliminary *non-seasonally adjusted* payroll employment figure for July totaled 131.1 million jobs, a slight decrease from June's 132.3 million jobs mark.

"The July numbers are typical for this time of year, and aren't that surprising" said Mike Draper, deputy commissioner of the Indiana Department of Workforce Development. "Each July a variety of factories, schools and other employers temporarily close for summer breaks, model year change overs, re-tooling or inventory. When these shutdowns occur in the time period in which the survey is taken, those jobs are counted as lost. It does not mean those jobs are gone, it simply means at the time this survey was taken, those individuals were not on the job."

"Further proof of this is found by looking at the number of unemployment claims established throughout the month. In July unemployment claims did go up in the first two weeks of the month, as they do every year, due to temporary layoffs. However, by the third week claims were back down to normal levels. This bears out the notion that those jobs didn't go away forever, they just weren't counted due to timing." (see *graphic attached*)

Also released today were revised **June payroll employment figures**. Revised *seasonally adjusted* numbers show that Indiana actually had 2,913,500 jobs in June, 3,100 fewer jobs than were estimated in the preliminary figures. June's non-seasonal figure was also revised downward to 2,878,400 total jobs, down 36,900 from the preliminary estimate.

Seasonally adjusted figures:

In July Indiana's economy lost 1,700 jobs from June (revised), however the preliminary figure also shows a net gain of 17,100 jobs when compared to July 2003. According to the preliminary July 2004 estimate the total number of jobs in the state, after the seasonal adjustment, totaled 2,911,800, up from 2,894,700 in July of 2003.

Looking at July's preliminary seasonally adjusted numbers by **industry super-sector**, Indiana's goods-producing sector reported employment of 727,400 in June, down 200 jobs from June (revised), but up 9,300 jobs from July 2003. Of that figure, the construction sector saw no change in employment over the month remaining at 151,400 jobs. However the industry did see 8,300 jobs from July 2003.

The state's manufacturing sector shed 300 jobs from June to July to reach a total of 568,700. The July 2004 number is still 900 more manufacturing jobs than existed in July 2003, and it is the largest year-over-year seasonally adjusted growth since June 2000.

Indiana's service-providing sector reported employment totaling 2,184,400 in July. This figure is down 1,500 jobs from June's revised seasonally adjusted number, but 7,800 more than compared to July of 2003. Of that, the professional and business service sector grew 700 jobs from June to July to reach 259,800 total jobs, 6,400 more jobs existed in the category in July 2003. The leisure and hospitality sector reached a total of 272,300 positions for the month. The trade, transportation and utilities sector grew 200 jobs to from June to July to reach 571,500 total jobs. The state's education and health services sector reported a loss of 200 jobs from June to July, with 371,100 total jobs. The July preliminary figure is still 4,800 more jobs than existed in the sector in July 2003.

(NOTE: ONLY LARGE INDUSTRY 'SUPERSECTORS' CAN BE DESCRIBED IN SEASONALLY ADJUSTED TERMS. FOR MORE SPECIFIC DETAIL ON INDUSTRIES, USE NON-SEASONALLY ADJUSTED NUMBERS)

Non-Seasonally adjusted figures:

In July Indiana's economy lost 33,800 jobs from June (revised), however the preliminary estimate also showed the state gained 17,300 net new jobs since July 2003. According to the state's July 2004 preliminary non-seasonally adjusted payroll estimate totaled 2,878,400 jobs, up 17,300 jobs when compared to July of 2003.

Using preliminary non-seasonally adjusted figures to look at the state's **industry sectors**, Indiana's goods-producing sector reported employment of 734,500 in July, down 4,700 from June, but 9,200 more than existed in July 2003. Of that figure, the construction sector saw employment grow by 1,700 jobs from June to July to total 160,400 jobs, 8,200 more than existed in July 2003.

The manufacturing sector reported 566,800 jobs for July, a decrease of 6,500 from June but 900 more than existed in July 2003. The .16 percent growth is the largest year-over-year growth the state has seen since June of 2000.

Indiana's service-providing sector reported employment-totaling 2,143,900 in July, down 29,100 from June but up 8,100 compared to July 2003. Of that, the professional and business service sector reached 261,500 jobs in July, 6,400 more than existed in the same time last year.

Sectors showing major employment declines were primarily in the service sector. Retail trade lost 1,000 jobs from June to July to reach 333,000 total jobs. The leisure and hospitality sector, which includes amusement, gambling as well as food services also showed declines in July, with a 1,500 fewer overall jobs in the industry.

Also reporting substantial losses were government sectors, which was down 24,800 jobs from June to July, totaling 380,200 jobs. Of that local governments shed 26,100 jobs over the month to reach a total of 237,100 jobs, 600 less than existed in July 2003. With 106,200 jobs, the local government education sector also posted 25,100 jobs loss from month-to-month.

Looking at preliminary job numbers in the state's **Metropolitan Statistical Areas (MSAs)**, the Bloomington area saw a net gain of 1,500 jobs in July as compared to a year ago. The Elkhart-Goshen MSA's employment data remained unchanged over the year, while the Evansville area saw a net loss of 700 jobs over the year. The Fort Wayne MSA reported a gain of 2,400 jobs over the year, while the Gary-Hammond MSA lost 2,500 jobs over the year. The Indianapolis MSA also lost 6,900 jobs as compared to July 2003, with the Kokomo area gaining 2,400 jobs over-the-year. The Lafayette area showed a 3,100 net job gain as compared to the same month last year, while the New Albany and Muncie MSAs each lost 1,500 jobs over the same period. The South Bend-Mishawaka and Terre Haute MSAs both reported year-over-year growth of 2,100 and 1,200 jobs respectively.

Through its various programs and initiatives, the Indiana Department of Workforce Development is charged with continually improving the Hoosier workforce by assisting companies to create new jobs and improve employee skills. The agency offers a variety of training and educational grants, partners with the state's 27 WorkOne Centers, administers the unemployment insurance system, provides labor market information, assists employers with preparing workers for layoffs, and closures and operates a statewide job placement service.

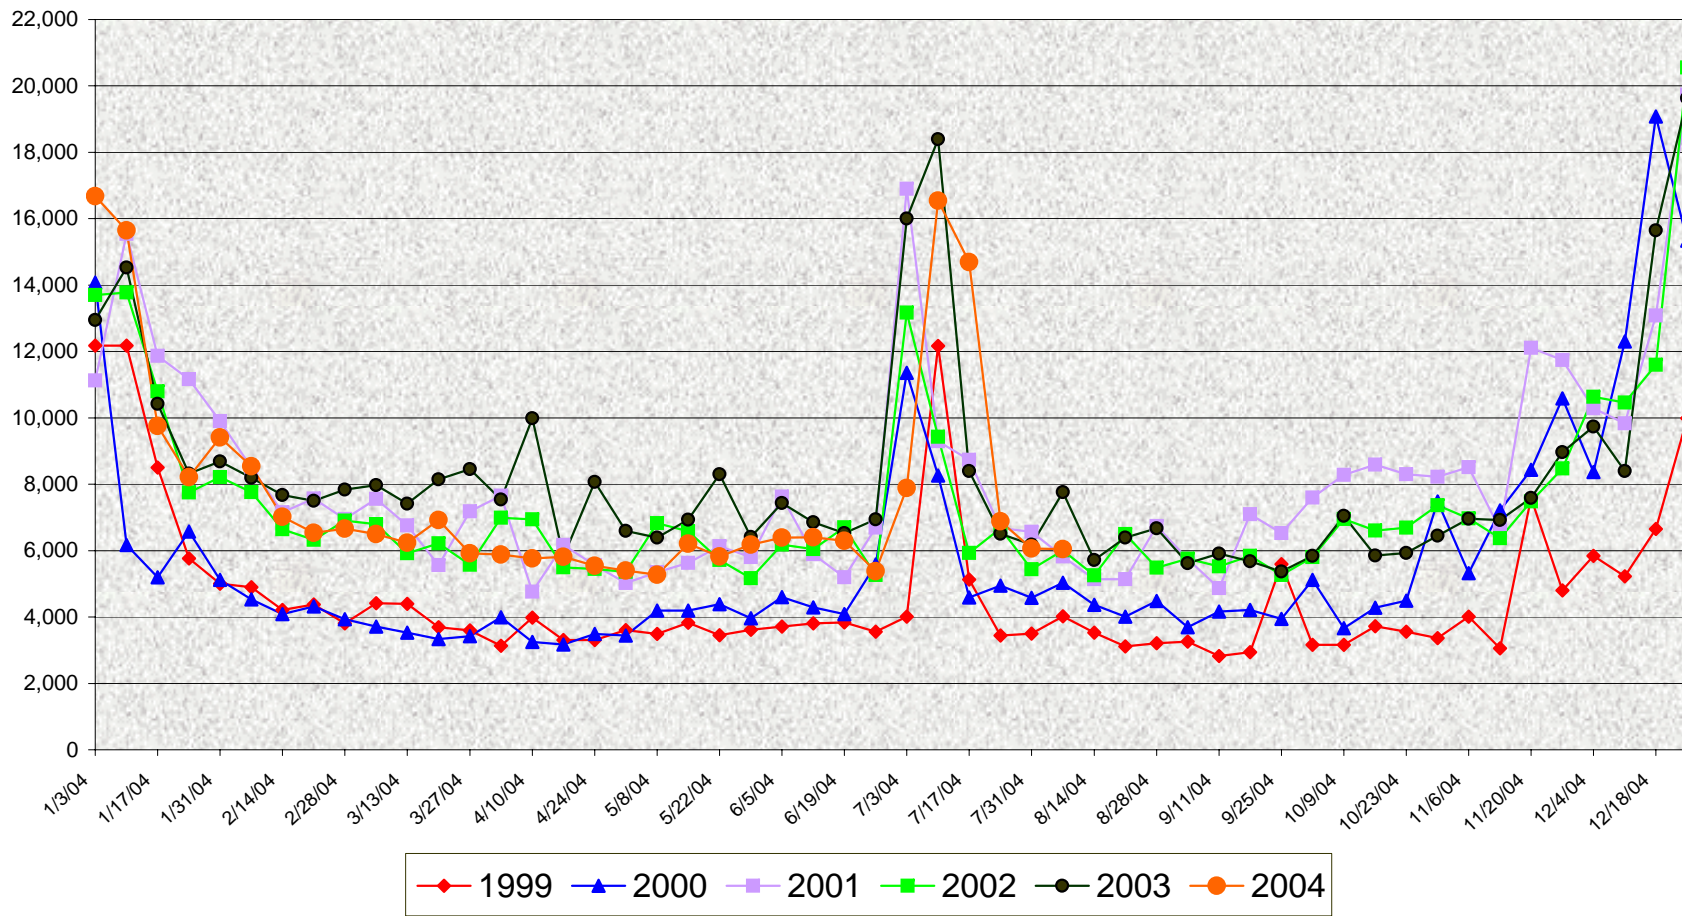

For more information on Indiana's labor market, contact the Indiana Department of Workforce Development at 1-888-WorkOne, or visit the web site at www.workforce.IN.gov.

Technical Notes:

- Payroll employment is calculated through a monthly survey of 7,500 Hoosier employers and is based on reported payroll figures. It is an estimate of non-agricultural jobs in Indiana businesses and does not include self-employed or agricultural workers.
- The survey that calculates the payroll employment estimate is conducted by the U.S. Bureau of Labor Statistics and is conducted during the week of the 12th of the month.
- In calculating employment figures, two different types of calculations are provided. The first, *non-seasonally adjusted*, provides information without taking into account the effects of seasonal trends. In calculating the *seasonally adjusted* information, employment that follows more or less a regular pattern each year, including holiday or summer employment is factored out of the estimate. The adjustments make it easier to observe the cyclical and other non-seasonal movements.
- For most accurate analysis, please use revised data sets and not preliminary estimates
